This workshop is designed for healthcare professionals who wish to advance their leadership and management skills with a focus on changing practice and improving care.

During this highly interactive workshop led by an experienced leadership coach, you will learn about your own style of leadership and how to adapt that style when needed. In between workshop sessions you will be able to implement this learning in your workplace and bring the learning from this to the second session.

By the end of the two sessions you will have the confidence and organisational sensitivity to lead a change process within your working environment.

You will learn to...

- Understand yourself and others better
- Work more effectively with colleagues and to lead by example
- Appreciate the principles of managing change
- Implement the basics of improvement methodology
- Feel empowered to set direction for improved care

Our workshops

All our workshops are led by trained facilitators who are leaders in their field. We use high-quality learning materials and interactive practical exercises to tailor content for the individual group.

To maximise both individual and collective learning we actively encourage participation. We also believe that learning should be fun.
