

Covid-19 Resource Centre

Welcome Pack

**education
for health**

SUPPORTING
**RESPIRATORY
IMPROVEMENT**

Welcome to your COVID-19 Resource Centre:

Response, Vaccine and Recovery

We have designed this new resource centre to support you in all areas of Covid-19 care. Whether that be building upon your existing knowledge to deliver the vaccine safely and effectively, providing you with clarity on Long COVID advice on how to set up and manage vaccination clinics, these resources aim to provide you with the support you need at this challenging time.

The Resource Centre content has been set up so that you are able to access the learning that is pertinent to you. So, you can be ready to deliver the vaccine after completing the necessary learning from day one and/or access the resources to support your patients around Long COVID. You will then have ongoing access for six months to a range of resources to keep you updated regarding developments around the virus and the vaccine.

Content is created and delivered by leading academics and expert clinicians and is updated on a regular basis to ensure you have the most relevant and up to date information, so make sure you log in regularly during your six month subscription to make the most of all the resources. What's more, if there's anything specific you'd like to see that we haven't yet covered, let us know and we'll do our best to help.

The following workbook will provide you with an overview of how to access the resource centre, the structure of the materials, and the training that you will need to cover in order to fulfil the minimum training requirements to administer the COVID-19 vaccines.

We wish you all the best in your learning journey.

The Team at Education for Health

How do I access the resource?

1. Use the following URL link to go straight to the login screen
<https://www.educationforhealth.org/my-account>
2. You will need to enter a username - this is the email address you have provided
3. You will need to enter a password – this is one which has been supplied from Education for Health by email.

If you have lost or forgotten your password, you can reset it by selecting the 'Lost your password?' link from the screen you will be taken to using the URL provided in step 1 above or, alternatively, by following the steps below:

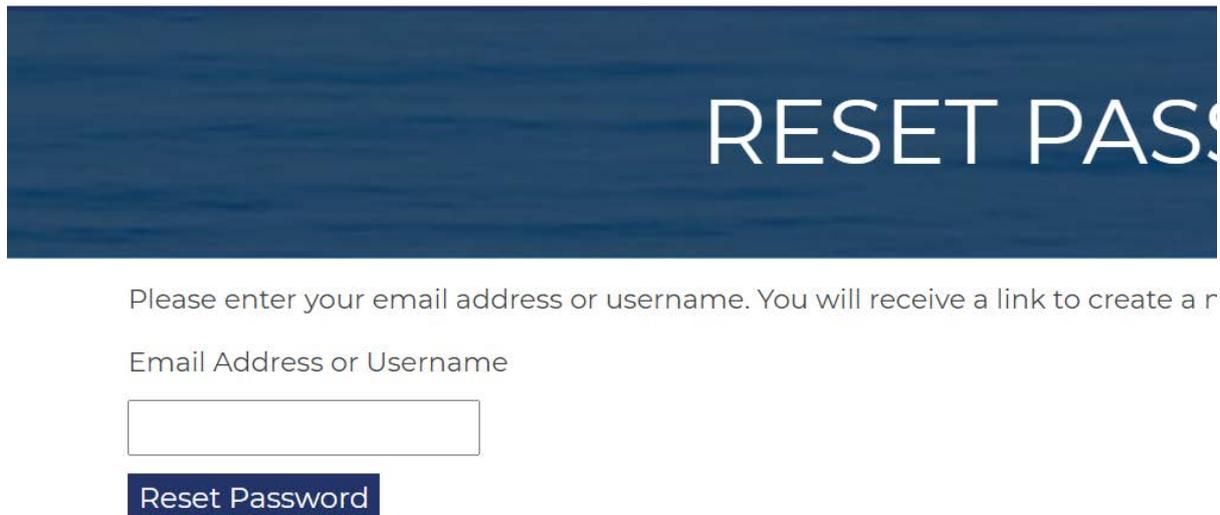

1. Access the Education for Health website at www.educationforhealth.org
2. Head to the 'my account ' area of the website - found in the top right-hand corner (circled in the below image):

3. You will be taken to the following login screen and will need to select the link to 'lost your password?' (circled in the below image):

4. You will be able to enter your email (the one you used to initially subscribe to the Resource Centre) and you will receive an email with a link to reset your password:

5. When you have reset your password you will be able to access the 'my account' section as shown above and enter your email address and new password to access your account.

When you are on the 'my account' screen, as shown below, you will see a link to the vaccination area in the Memberships section (as circled in the following image) – select the 'view' option to go straight to the Covid-19 Resource Centre:

Plan	Start	Expires	Status	
Covid-19 Response, Vaccination and Recovery Pack Programme	25th January 2021	25th July 2021	Cancelled	
Covid 19 Resource Taster	16th November 2020	N/A	Active	View

If you do need any technical support please contact:
learnersupport@educationforhealth.org

Your learning journey

The Resource Centre is divided into two key sections. The first focuses on vaccines. The second part explores management and recovery of Covid-19.

Within both sections you will find an array of content, which you can access at any time to suit you during your six-month subscription. Just click on the information that you're interested in and go from there.

The content is made up of podcasts, webinars and articles; and we'll even be running some live Q&A sessions where you can ask the experts those burning questions. And don't forget that this Resource Centre can be used as part of your CPD, so log in regularly to make the most of your six month subscription.

Part one: Vaccinations

When you log into the Resource Centre, a list of different sections will show on the left hand side. To start, we recommend going to the 'Learning about Covid-19 vaccines' section and working your way through it.

In order to meet the minimum training requirements to deliver Covid-19 vaccines, you will need to complete all of the training under the heading 'Administering the vaccine' (circled in the below image), which is found in the 'Learning about Covid-19 vaccines' section. If you will not be administering vaccines, but just want to understand the process further, you will not need to complete the assessments and programme completion form at the end of this section.

When you go into this section you will be able to select from a range of podcasts, toolkits and webinars. These will expand your knowledge on everything from reconstitution technique, storage guidelines to record keeping, PPE and patient aftercare. The Image below gives an example of what you'll see when logged into a section of the Resource Centre.

ADMINISTERING THE VACCINE

Welcome to the chapter – Administering the Vaccine. Within this chapter you will find, webinars, podcasts, and factsheets that cover the following:

- Infection control including wearing PPE (risk infection control)
- Who is the vaccine suitable for? – e.g. do you administer while patient is COVID-19 positive or negative
- Reconstitution of vaccine
- Storage of Vaccine
- Contraindications, side effects and safety profile
- Anaphylaxis
- Special and vulnerable groups
- Record keeping including history taking and consent
- GDPR
- Safety profile vs. side effects

WEBINARS AND PODCASTS

Minimum Training Requirement – These resources fulfill the minimum training requirement needed to deliver the Covid-19 Vaccine.

This presentation will cover details around the Oxford–AstraZeneca. This presentation will cover details such as the vaccine specifics, storage and contraindications.

This lecture will cover details around the Pfizer BioNTech Vaccine. This lecture will cover details such as the vaccine specifics, storage and contraindications.

This video will provide you with an overview of how to reconstitute the vaccine as well provide key insights into aseptic techniques.

This video will provide you with an overview of how to reconstitute the vaccine as well provide key insights into aseptic techniques

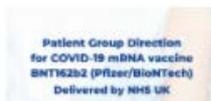

The following video provides end to end overview of a patient receiving the Pfizer BioNTech Covid-19 Vaccine.

This is an assessment that is set by Public Health England and must be completed prior to delivery of the COVID-19 vaccine. **This assessment is external to Education for Health and you will need to register at that site in order to complete.** A pass must be obtained and you can generate a certificate as required.

WORKBOOKS AND USEFUL RESOURCES

Minimum Training Requirement – These resources fulfill the minimum training requirement needed to deliver the Covid-19 Vaccine.

Public Health England (PHE) has developed this PGD for authorisation by NHS England and NHS Improvement to facilitate the delivery of the national COVID-19 vaccination programme.

An overview of COVID-19 local vaccination services procedure in community settings.

Public Health England (PHE) has developed this PGD for authorisation by NHS England and NHS Improvement to facilitate the delivery of the national COVID-19 vaccination programme.

A tool developed by Public Health England that assesses and ensures that anybody administering the vaccine is given the time and opportunity to undertake the comprehensive training they need and that they are supervised and supported in practice as required.

Let's look at these in more detail:

1) Pre-recorded lectures

Your first step is to work through the pre-recorded lectures. These components currently cover details around the Pfizer-BioNTech COVID-19 and Oxford - AstraZeneca Vaccines (information about other vaccines will be added as and when they become available in the UK). These lectures will provide you details around:

- Vaccine specifics – for example, how it is made, how it works, what it contains
- Who the vaccine should be given to
- Contraindications and precautions
- Legal issues including obtaining consent and legal framework to supply/administer the vaccine (PGD/PSD/protocol/patient specific prescription)
- How the vaccine should be stored
- Record keeping
- How to prepare the vaccine
- How and at which anatomical site to administer the vaccine
- How to recognise and respond to side effects following immunisation
- How to dispose of vaccine equipment
- What to expect after vaccination and other information to give those who have been vaccinated
- Where to record that the COVID-19 vaccine has been given and what to record
- How to put on and take off the personal protective equipment (PPE) required for immunization
- Infection prevention and control measures
- After care for the patient

2) Reconstitution and Aseptic Technique and Patient Overview Video

You will then need to review the videos above. These videos will provide you with an overview of how to reconstitute the vaccine as well provide key insights into aseptic techniques. In addition, you can also view an additional video around an end to end patient journey of a patient receiving the Pfizer BioNTech vaccine.

3) Core Knowledge for COVID-19 Vaccinators – Assessment

You will then need to complete the core knowledge for COVID-19 Vaccinators. You will need to complete this assessment and achieve a pass. You can generate a certificate as required. There are additional sections that can be viewed as part of this programme. These sections will complement the learning obtained in the pre-recorded lectures and videos.

4) Competency Based Assessment

The next step of your learning journey is to complete the Competency Based Assessment. This tool is developed by Public Health England that assesses and ensures anybody administering the vaccine has undertaken the relevant training to undertake this role. Please ensure you complete this.

Further resources:

Throughout your learning it is important you have access to:

- The Green Book in particular Chapter 14a: COVID-19 – The Green Book. This is available in your library.
- The Standard Operating Procedures (SOPs) in your work environment relating to needle stick injury, the importance of cold chain storage, infection prevention measures including the PPE required to deliver the service and undertaking COVID-19 test requirements as directed by your employer.
- The Patient Group Direction for the administration of the COVID-19 Vaccines. This is available in your resource library.
- SOPs for delivery of the vaccine issued by the NHS. This is available in your resource library.

5) Programme completion

WEBINARS AND PODCASTS

Minimum Training Requirement – These resources fulfil the minimum training requirement needed to deliver the Covid-19 Vaccine.

Once you have completed all the necessary learning please complete the programme completion form located on the left hand side.

Part two: Management and recovery

Within the management and recovery section of the Resource Centre, you'll find sections focused on:

- Pulmonary rehabilitation
- Recovering from Covid-19
- Managing Covid-19 remotely
- Long COVID-19

There is no particular order to complete this section and therefore we recommend selecting the parts that are most relevant and of Interest to you to access first. Within these sections there are various podcasts, webinars, articles and much more.

We hope you the Resource Centre is a useful tool for you in the challenging and complex times of Covid-19. If you require any further support, contact us at: learnersupport@educationforhealth.org
