

## FeNO Testing and CO Monitoring Workshop

A two-hour interactive webinar exploring how and why these tests are used in practice

### Delivery:

Two-hour interactive webinar delivered via Microsoft Teams

### Course Content:

Understanding FeNO and CO monitoring tests has never been more important than now due to the impact of COVID-19. This course has been designed to provide an overview of how these tests are performed and interpreted in practice, and how they can be used to inform diagnosis and treatment pathways.

The workshop is aimed at healthcare professionals involved in respiratory disease examination and management. It can be undertaken as a standalone session or alongside our other diagnostic courses such as Spirometry Interactive Blended Online Learning (including ARTP assessment access) programme as well as our university accredited courses in respiratory.

Led by an experienced clinical specialist and facilitator, this highly interactive session will enable learners to develop knowledge and know-how and engage in best practice discussions with peers.

### Course Outcomes:

On completion of this session, learners will be able to:

- Understand why FeNO testing is used in the differential diagnosis of asthma or chronic airways disease.
- Explain how FeNO testing is performed and how to prepare the patient.
- Understand how to interpret FeNO measurements.
- Explain how to use measurements to inform medication monitoring.
- Explain how exhaled carbon monoxide is measured.
- Explain why this test is used in practice.
- Understand how CO monitoring tests are performed in practice.
- Understand the implications for prevention and health promotion.
