Support your patients, improve your knowledge

This workshop is designed to support health professionals who want to know more about inhaler technique to improve the care and management of patients with respiratory disease who require inhaled therapy.

In 2011, 45 million prescriptions\(^1\) for inhaler medications were dispensed in England. Poor inhaler technique is commonly demonstrated among both patients\(^2/3\) and health care professionals resulting in suboptimal control, reduced quality of life for patients, increased urgent care use and hospital admissions, increased primary care consultations, unnecessary escalation of treatments and avoidable NHS costs.

Through informal lectures and interactive practical sessions delivered by expert practising clinicians, the workshop provides a valuable overview of inhaler technique and the practical skills help patients improve their inhaler technique.

---

---

You will learn about . . .

- Different inhaler techniques
- The impact of poor inhaler technique
- How inhalers work
- Helping patients to improve their inhaler technique

Our workshops

All our workshops are led by trained educators who are also experienced practicing clinicians. We use high-quality learning materials and innovative practical exercises to tailor content for each group. We believe that learning should be fun and we always encourage participation.
