Introduction to Paediatric Asthma

One-day practical workshop

Taking **action**
educating
people and
transforming
lives worldwide

Course information

Duration:

1 Day

Style:

Interactive workshop with
breakouts and group discussion
(includes certificate of attendance)

CPD Value:

6 hours

Support your patients, improve your knowledge

This workshop is designed for healthcare professionals, including health visitors, school nurses and practice nurses, who care for children suffering from asthma – a condition which currently affects one in every eleven children in the UK, and which is becoming increasingly prevalent¹.

Taught by expert practising clinicians, this workshop has been developed as an introduction to paediatric asthma, particularly in primary care and community settings. It will help you to recognise and manage acute symptoms, to identify poor control of the condition and to decide when the patient should be referred on.

Through informal lectures and interactive practical sessions delivered in an informal and supportive environment, you will gain the confidence to effectively manage children with asthma at home, at school and in early years' settings.

¹ <http://www.blf.org.uk>

You will learn to . . .

- Understand the epidemiology and impact of asthma
- Make an accurate diagnosis
- Assess and manage acute episodes
- Apply BTS/SIGN guidelines in management
- Use inhaler devices
- Manage asthma in schools

Our workshops

All our workshops are led by trained educators who are also experienced practising clinicians. We use high-quality learning materials and innovative practical exercises to tailor content for each group. We believe that learning should be fun and we always encourage participation.
